

**ENTstatistics**

# Questionnaire Functionality

This functionality enables patients to complete questionnaires on tablets, smartphones or at home on the web. The responses are sent automatically to ENTstatistics, where they are displayed clearly. The questionnaire scores are available for queries and statistical evaluations. This functionality can optimise workflows and save a significant amount of time.

The screenshot displays two overlapping windows from the ENTstatistics system. The top window shows a questionnaire titled 'Tinnitus Handicap Inventory' with the question: 'Because of your tinnitus, do you have trouble falling to sleep at night?'. The response options are 'Yes', 'Sometimes', and 'No', with 'Sometimes' selected. A progress bar indicates 7/25 questions completed.

The bottom window shows the 'Patient Information' and 'Summary' for Lara Hörgut. The patient's data includes:

- PID: 2001
- Geb.: 16.01.2009 (11 J)
- Geschlecht: w
- Vers.-Nr: 521.5631.2521.56
- Stadt: Atach
- Fak-Nr: 2001
- Aktionen: [Icons]

The 'Summary' section shows the following data:

	Score	max. Score
THI	56	100
Sum of scores (56 %)	56	100

The 'THI' section lists individual questions and their scores:

- Because of your tinnitus is it difficult for you to concentrate? (x) Sometimes 2 / 4
- Does the loudness of your tinnitus make it difficult for you to hear people? (x) Sometimes 4 / 4
- Does your tinnitus make you angry? (x) Sometimes 2 / 4
- Does your tinnitus make you feel confused? (x) Sometimes 4 / 4

Recording of an online questionnaire and presentation of the responses in the Diagnostic Manager

## The functions at a glance

- Completion of questionnaires on a tablet, a smartphone or in an Internet browser
- Sending of questionnaire invitations by e-mail to patients
- Printing of blank questionnaires to be completed in handwriting by patients
- Fast transfer of manually entered responses with a dedicated editor
- Graphical progress display in the optional ENTstatistics dashboard
- Availability in the advanced search, global evaluation and Excel export

The questionnaire is sent to ENTstatistics.

## Tailored to your needs

The questionnaires can be setup easily using the Admin Tool of ENTstatistics . This allows you to configure self-developed question/criteria catalogs for various areas (e.g. tinnitus, quality of life, language development, ...). As part of the optional “carefree package for questionnaire configuration”, INNOFORCE supports you and configures the questionnaires in accordance with your requirements.

<sup>1)</sup> INNOFORCE does not sell licences for questionnaires but only the feature for configuring questionnaires and completing them. In the case of questionnaires requiring a licence, the client is responsible for possessing the necessary right to use these.

**Prof. Andreas Leunig**  
ENT practice and rhinology centre  
Munich, Germany

*“We use ENTstatistics at our centre for the structured documentation of patient data. The program is also used for evidence-based quality assurance.*

*In my opinion, the new online questionnaire functionality is of particular value. This allows patients to enter details of their medical history or symptoms themselves on an iPad or a smartphone. In addition, questionnaires can be sent by e-mail as a link and can be filled out in an Internet browser from home or on the move, for example. As soon as the patient has answered the questions, they are transferred to the system and displayed there.*

*Patients thus take over part of the previously time-consuming data acquisition process. I particularly appreciate the graphical progress display of questionnaire scores in the ENTstatistics dashboard.*

*The graphical visualization and evaluation of our treatment results is becoming increasingly important. Thanks to ENTstatistics, it is possible to collect the necessary data without any significant additional effort, even in times of considerable pressure to document. This valuable tool should become a standard part of clinical routine.*

*We have been working with ENTstatistics since 2014 and can no longer imagine life without it!*

*... many thanks to the INNOFORCE team!”*
