

# We are all ears.

Your partner for software development  
in ENT and ophthalmology

## INNOFORCE sets new standards

As an engineering company, INNOFORCE specialises in the development of clinical informatics software, particularly for use in the ENT, hearing aid acoustics and ophthalmology fields.

Customers in over 30 countries have come to value our pioneering software developed for use in these applications and have got to know us as a reliable service-orientated supplier.

## From standard products to individual solutions

INNOFORCE offers a wide range of tried-and-tested products. They have been developed in close collaboration with medical specialists and their excellence is acknowledged by experts worldwide. In addition, INNOFORCE is able to develop solutions to meet individual customer needs.

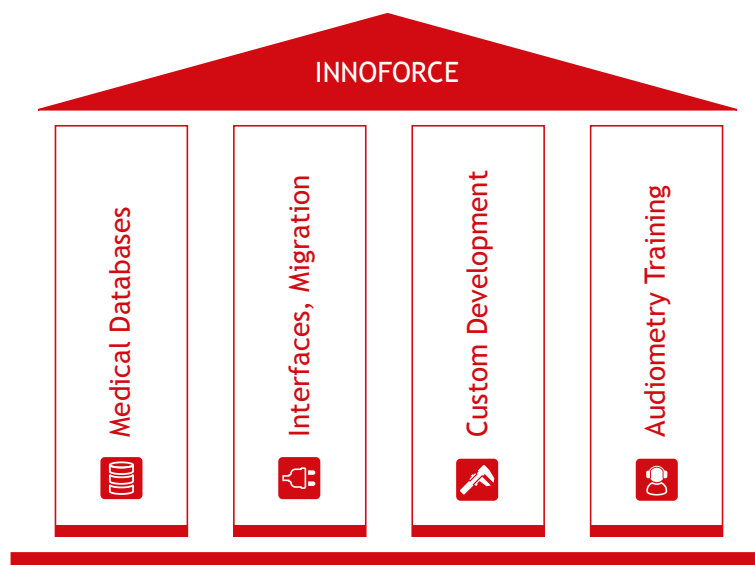

If you are looking to realise your concepts in the form of clearly structured and easy-to-master software programs, INNOFORCE is the right partner for you. Thanks to the creativity of our software engineers, our use of cutting-edge technologies and our ability to design individually tailored systems, we can provide solutions that will precisely meet your individual requirements.

Take advantage of our know-how in the fields of professional software development and comprehensive IT solutions in the following areas:

- Therapy databases (Windows and web applications)
- Interface connections with technical medical devices
- Integration of systems in the IT infrastructure of hospitals (HL7, DICOM)
- Data migration

## A finger on the pulse of clinical practice

It goes without saying that we collaborate closely with leading hospitals, universities and institutes of higher education. This exchange of information with specialists ensures that we are always up-to-date when it comes to the latest developments in various disciplines and can use this knowledge when creating our products. Our close cooperation with the manufacturers of diagnostic devices means numerous interface systems are available to us for use in the collation of the results of examinations.

“  
We create  
userfriendly IT  
solutions that  
delight our  
customers.”
