

— A JOB —  
WITH PROSPECTS

# THE ENTERPRISE

INNOFORCE is an innovative and dynamic engineering company. Our key competencies lie in medical informatics, with a special emphasis on otolaryngology, hearing aid acoustics and ophthalmology. We are among the leading suppliers of pioneering software in these fields, with clients in more than 20 countries.

INNOFORCE was founded in 2004, and has in the meantime established sites in Ruggell (LI), Linz (AT) and Riga (LV).

#### Prominent among our clients are:

- University hospitals on four continents
- Medical practices
- Manufacturers of hearing aids and hearing implants
- Pharmaceutical companies
- Medical societies
- Training establishments for hearing aid acoustics

## LIENE

SOFTWARE ENGINEERING  
MEMBER SINCE 2015

“There’s no other team in which overcoming challenges is so much fun.”

DEPARTMENT VAN GESONDHEID

- + ... enjoys an excellent reputation as a competent partner for the development of user-friendly software.
- + ... supports its clients in the search for individual solutions for specific individual requirements.
- + ... maintains co-operative ventures with various universities and colleges. We regularly contribute presentations in the fields of economics, medicine and ICT.

# A JOB WHERE YOU CAN MAKE A DIFFERENCE

We work in close collaboration with leading clinics and industrial partners and have already successfully implemented various projects which have been highly regarded by experts in their fields. Most of our projects have close links to applied research, e.g. statistical databases together with measuring systems for research purposes. Most of the people working at INNOFORCE have graduated from universities or colleges of applied science. Each day regularly presents exciting challenges full of variety.

## Some of our major projects include:

- National Quality Register for the Australian ENT society ([www.aoqan.org](http://www.aoqan.org))
- Research database for ear, nose and throat therapy ([www.entstatistics.com](http://www.entstatistics.com))
- Database system for the integration of different diagnostic devices in a hospital ([www.diagnostic-manager.com](http://www.diagnostic-manager.com))
- Expert system for the documentation and evaluation of eye therapies ([www.eyeclinicmanager.com](http://www.eyeclinicmanager.com))
- System for the acquisition and statistical evaluation of questionnaires by tablet or smartphone ([www.medquestionnaire.org](http://www.medquestionnaire.org))
- Platform for the realization of multicentre research studies ([www.mcs.network](http://www.mcs.network))

## YOUR BENEFITS

- + Interesting and creative work in a young, dynamic and highly motivated team
- + The chance to develop your own ideas and put them into effect
- + Operating in an international research and commercial environment
- + Coaching by experienced colleagues
- + Promoting your own development
- + Your commitment can help improve the quality of medical care.
